

Hiring Supervisor: Jason Petermeier
Position Status: Salaried
Location: Lewisville, TX
Job Classification: Product Line Manager

Company:

ELM FieldSight provides unique solutions in Asset Monitoring and Control to their customers. Their suite of products includes:

- Microgrid controllers for energy systems that include generators, inverters, solar arrays, and batteries
- Battery Energy Storage Systems for home, commercial, and utility scale

For these different product lines, they are responsible for designing the system architecture, hardware selection, software development, configuring and installing systems, as well as the back-end web monitoring and database.

Job Description:

ELM FieldSight is looking to hire a Product Line Manager to oversee the research, design, controls, tests, installation, and maintenance of their MG series of Battery Energy Storage System product lines. This applicant would be responsible for working with their customers to understand their project needs while working with ELM Engineering and Manufacturing to design, build, test, and deliver working systems that meet their customer's requirements. They will also need to manage costs to ensure product profitability and schedules to meet customer's deadlines. This applicant would also perform market and industry research to make sure their product is meeting all industry and safety requirements as well as utilizing the best available technology.

This position requires an understanding of the power and renewable energy industry. This candidate must be able to talk technical aspects of the product with both their customers and engineering. An understanding of power system design including low and medium voltage is a plus. This applicant must be familiar with a variety of the field's concepts, practices, and procedures, relies on experience and judgment to plan and accomplish goals, and perform a variety of complicated tasks.

Qualifications:

- Requires a bachelor's degree – Electrical or Systems Engineering Preferred
- Knowledge of stationary energy storage systems is required
- 10-20 years of relevant experience
- Must have effective oral and written communication skills and work well with people
- Must be a self-motivator to create and coordinate their own tasks and goals.
- This job could require up to 20% travel.

Application Procedure:

Please apply by emailing your resume or application to Jason Petermeier jpetermeier@elm-ess.com
