CONGRESSMAN BURGESS SENIOR LEADERSHIP VISIT ELM COMPANIES TEXAS FACILITIES

Recently, ELM Companies hosted James Decker, Chief of Staff and Erik With, District Director to Congressman Michael Burgess to their Texas facilities in Lewisville and The Colony. Congressman Burgess, also a licensed medical doctor, represents Texas' 26th district, which encompasses the city of Fort Worth and much of the surrounding area. The visit centered around ELM's significant growth in the renewable energy storage sector and the policies that promote clean energy.

The leadership team of ELM MicroGrid and ELM Solar briefed Decker and With on ELM'S microgrid product series and the ELM Solar/Thermal technologies. Congressman Burgess representatives were able to tour ELM's existing Lewisville, TX manufacturing facility, as well as the new facility under construction in The Colony, TX. ELM recently announced the construction of this new 125,000 Sq Ft headquarters and manufacturing facility for their MicroGrid and Solar Divisions. At full capacity, the facility will employ over 100 clean energy professionals, including engineering, production technicians, customer service, sales, and management. The addition of this production facility will expand the total production footprint for ELM's Microgrid division to almost 200,000 sq. ft. across Texas and Oklahoma and will expand production capacity to 500 Units per Year.
